

K-Love is an important asset to my community and family of four. It provides me the spiritual and encouraging music which is extremely valuable to us. We also hear about local concerts and events in our area. We rarely listen to anything else. If Klove were to be displaced by one of the low power stations, an LPFM, then it would be a dramatic turn for the worse for us and our community!!

K-love serves the public interest in that it promotes respect for our country and its leaders, encourages people to vote, regardless of party lines, and keeps me informed of issues that interest me.

The public interest is also served by K-Love's support of true diversity... the Good News, and is a significant and under-represented alternative to shock jocks and most non-kid friendly programming on the air. There is no other station on the air which is safe for my young children to hear! No other which plays songs continuously which promote morality, modesty and hope.
